

## GENERAL HOSPITAL - DISCHARGE SUMMARY

Patient: DEMO PATIENT 001

Discharge date: 2026-04-09

Service: Internal Medicine

Reason for admission: Exacerbation of upper respiratory symptoms in the context of allergic rhinitis.

Clinical course: Hemodynamically stable, afebrile, no respiratory failure during stay.

Discharge diagnoses:

1. Persistent allergic rhinitis.
2. Mild sinusitis resolved with conservative treatment.

Discharge treatment:

- Intranasal budesonide 64 mcg every 12 hours.
- Cetirizine 10 mg once daily for 30 days.
- Nasal saline irrigation.

Recommendations: avoid dust-mite exposure and follow up with primary care in 2 weeks.
